Monitoring

[Redacted]	No direct impact has been identified. Current services and support will continue for all citizens with protected characteristics. The services in scope are accessible by groups regardless of protected characteristics. This EIA has not identified any adverse impact as a result of the replacement of existing funding with public health grant funding, as this will allow the continuation of existing services and support. Further funding will need to be identified after this period, and this will form part of regular commissioning and finance monitoring and development activity during this period.
